

SOUNDGEAR

**Arm yourself
with the best**

Trust your ears to SoundGear

Whether you're in the woods, at the range or on the factory floor, hearing is key to your success and safety. Yet the competing need to protect your hearing from the damaging sound of gun shots, power tools and industrial machines creates a unique noise management challenge.

SoundGear solves that challenge.

High-definition sound enhancement & automatic noise suppression

SoundGear represents the latest advancements in hearing protection. This unique family of products protects your hearing from loud noises like gun shots, engines and power tools and our electronic products enhance environmental awareness.

Made by Starkey — America's premier provider of hearing solutions — SoundGear devices feature advanced digital technology capable of enhancing sound eight times over traditional hearing protection products. That same technology simultaneously detects loud impulse noises as they happen, instantly and automatically suppressing them to protect your hearing.

SoundGear Features:

Dynamic digital noise protection for your ears

High-definition sound enhancement

Hear and locate flushes, whistling wings, gobbles and movement while also suppressing gun blasts

Noise Reduction Rating (NRR) of up to 25dB*

Seamless sound-activated compression automatically suppresses noises

All-day, easy-to-wear comfort

*depending on model

PHANTOM

The world's first custom, Bluetooth[®], rechargeable hearing protection and enhancement device.

Phantom delivers benefits no other single product can:

- Automatic protection from loud sounds and gun shots.

Non-Electronic Custom Fit

As the recognized experts in custom hearing instruments, Starkey and SoundGear integrate the same breakthrough manufacturing and technology innovation into our earplug solutions that are customized for every patient. **The result is unrivaled fit and comfort.**

Solid Ear Plugs

Custom fit solid earplugs are made with super soft, high strength silicone and provide outstanding noise protection in a variety of recreational and occupational environments where high levels of noise are present.

Filtered Ear Plugs

Commonly referred to as musician or industrial earplugs, these custom-fit earplugs attenuate across all frequencies rather than just low- and mid-range frequencies, making music and environmental sounds much clearer and more natural. These are available with multiple filter options including a 10dB, 17dB, 26dB, Impulse (33.1dB IPIL) or solid filter.

High-Frequency Noise Filters (Hocks Noise Braker)

These custom earplugs contain a patented acoustical chamber and filter to attenuate sound to appropriate levels in the work place or on the range.
